

PROTESIS PENIANAS: INSTRUMENTAL

Lic. Patricia Ibañez

Control de la Infección

Equipo Quirúrgico

- El equipo quirúrgico deberá higienizarse durante 10 minutos
- Minimizar la cantidad de personal en el quirófano
- Usar un antibiótico de amplio espectro como irrigante

Control de la infección

(Paciente)

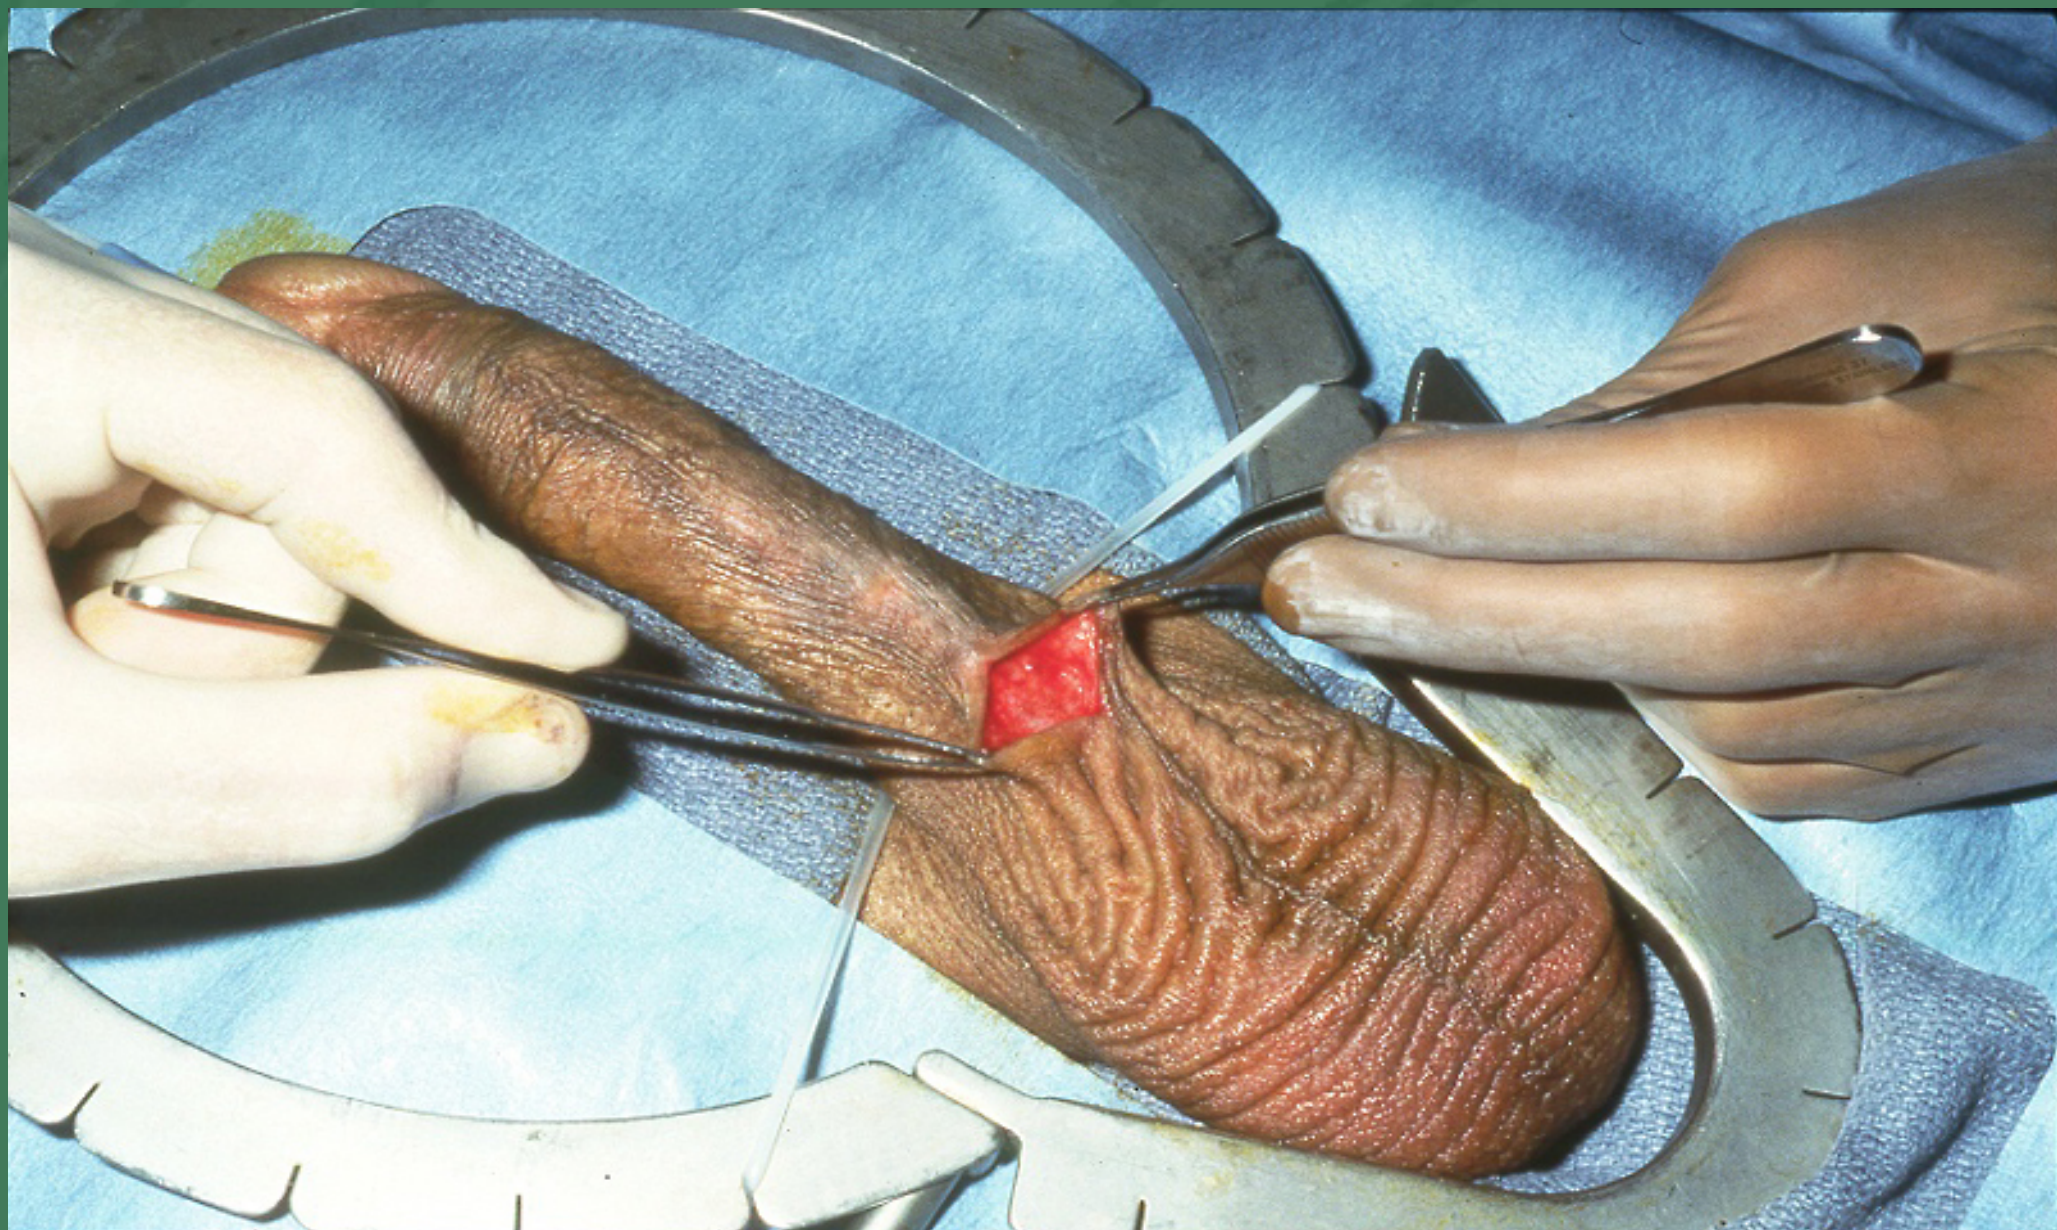

- Verificar que el paciente esté libre de infección y que haya recibido tratamiento antibiótico profiláctico
- Lavar el área quirúrgica con jabón de iodopovidona
- Rasurar al paciente en el quirófano
- Cubrir al paciente con campos impermeables autoadhesivos
